

Inclusion for disabled wildlife viewers: A literature review

Freya McGregor, Emily Sinkular, and Ashley Dayer

1

Welcome!

**Ashley Dayer,
PhD**
Associate Professor
Project PI

**Freya McGregor,
OTR, ADAC, CIG**
Research Associate
Project Co-PI

Emily Sinkular
PhD Student

2

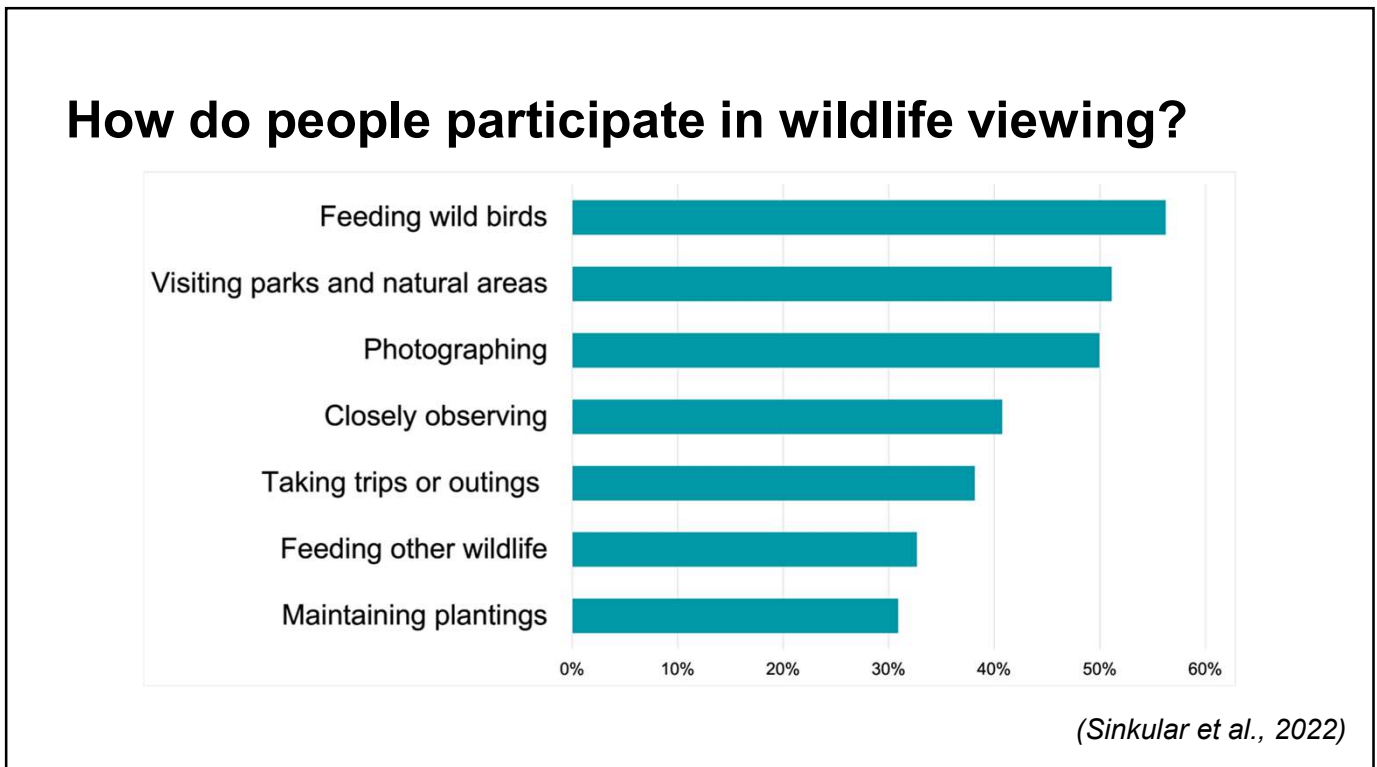

What is Wildlife Viewing?

“Closely observing, feeding, and photographing wildlife; visiting parks or natural areas to observe, feed, or photograph wildlife; and maintaining plantings and natural areas for the benefit of wildlife.”

(U.S. DOI et al. 2018)

3

4

What types of wildlife do people view?

The majority of respondents were interested in viewing **wild birds (79%)** and/or **land mammals (68%)**.

(Sinkular et al., 2022)

5

Do wildlife viewers engage in hunting and angling?

29%

only fish and
view wildlife

3%

only hunt and
view wildlife

14%

fish, hunt, and
view wildlife

54%

only view
wildlife

(Sinkular et al., 2022)

6

How is wildlife viewing impacted by disability?

39%
of wildlife viewers
experience accessibility
challenges.

(Sinkular et al., 2024)

7

Do agencies and organizations need to consider wildlife viewers with disabilities?

Agencies and organizations must ensure that **people with disabilities have equal opportunities** to participate in all programs they offer.

(Americans with Disabilities Act, 1990)

8

**Inclusion for disabled wildlife viewers:
A literature review**

Today's presentation

**Disability
and
inclusion**

**Wildlife
viewing
and
disability**

**Best
practices
for including
disabled
wildlife
viewers**

10

Disability and inclusion

11

What does it mean to have a disability?

Disability: “A physical or mental impairment that substantially limits one or more major life activities”.

May impact someone’s:

- Mobility
- Cognition
- Hearing
- Vision
- Ability to live alone, and/or
- Self-care (bathing or dressing).

(ADA National Network, 2023)

12

How common is disability in the U.S.?

1 in 4
Americans
have a
disability.

(Centers for Disease Control, 2020)

1 in 50
Americans
have a
diagnosed
mental health
condition.

(Mental Health America, 2022)

13

What is the difference between the ADA and inclusion of people with disabilities?

Americans with Disabilities Act, 1990:

- Federal civil rights law to prevent discrimination.
- State/local governments and businesses must comply.
- 2010 ADA Standards for Accessible Design:
 - Covers buildings, parking areas, recreation facilities.
 - Does not cover hiking trails.
 - A trail cannot be “ADA accessible” or “ADA compliant”.

(U.S. Department of Justice, 1990; ADA National Network, 2023)

14

What is the difference between the ADA and inclusion of people with disabilities?

Inclusion: An active and ongoing effort to **intentionally welcome** and **incorporate** people of diverse backgrounds and life experiences.

- The social and cultural environment: how people interact with each other.
- Just because an entity complies with the ADA does not mean someone with a disability will feel included there.

Photo: Freya McGregor.

(The George Washington University, n.d.)

15

To what extent do people with disabilities participate in outdoor recreation?

- Having a disability \neq not wanting to recreate
- **20% of public lands** recreationists had a family member with a disability
- People **with and without disabilities** are **similarly likely** to view wildlife

(Burns et al., 2023; Burns & Graefe, 2007; Sinkular, et al., 2024; Williams et al., 2004)

16

Wildlife viewing and disability

17

How do wildlife viewers benefit conservation?

Purchasing **products** that **benefit wildlife** or whose proceeds support conservation

Donating money to support conservation

Enhancing wildlife **habitat**

Collecting **data** on **wildlife** or habitat

Participating in civic **engagement**

(Cherry, 2018; Cooper et al., 2015; Williams et al., 2021)

18

Are there specific benefits of wildlife viewing and outdoor recreation for people with disabilities?

(Armstrong et al., 2022; Wilson & Christensen, 2012; Zachor et al., 2017)

19

What are the **personal barriers** to wildlife viewing with a disability?

- Lack of:
 - Time
 - Money
 - Equipment
 - Knowledge of where to go

*Not always within someone's control.

Photo: Patrick Oaks.

(Sinkular et al., 2024; Karns et al., 2023)

20

What are the **interpersonal barriers** to wildlife viewing with a disability?

- Lack of someone to go with
- Lack of other people supporting them to go
- Negative attitudes of others
- Crowds
- Safety concerns

(Sinkular et al., 2024; Karns et al., 2023)

21

Lack of accessible features create barriers to wildlife viewing with a disability

- Accessible trails
- Information about features
- Obstacles, eg. bollards, boulders, gates
- Benches/rest areas
- Accessible bathrooms
- Accessible parking
- Accessible public transport

Photo: Freya McGregor.

(Darcy, 2006; Dippenaar & Kotze, 2005; Karns et al., 2023; Mahmoudzadeh & Kourdi Sarjaz, 2018; Schahfer & Robison, n.d.; Sinkular et al., 2024;)

22

What are the **programming barriers** to wildlife viewing with a disability?

- Staff lacking an understanding of disability
- Lack of inclusive programming
- Lack of wheelchair accessible tour vehicles
- Lack of awareness of the impacts of intersectionality

Photo: Freya McGregor.

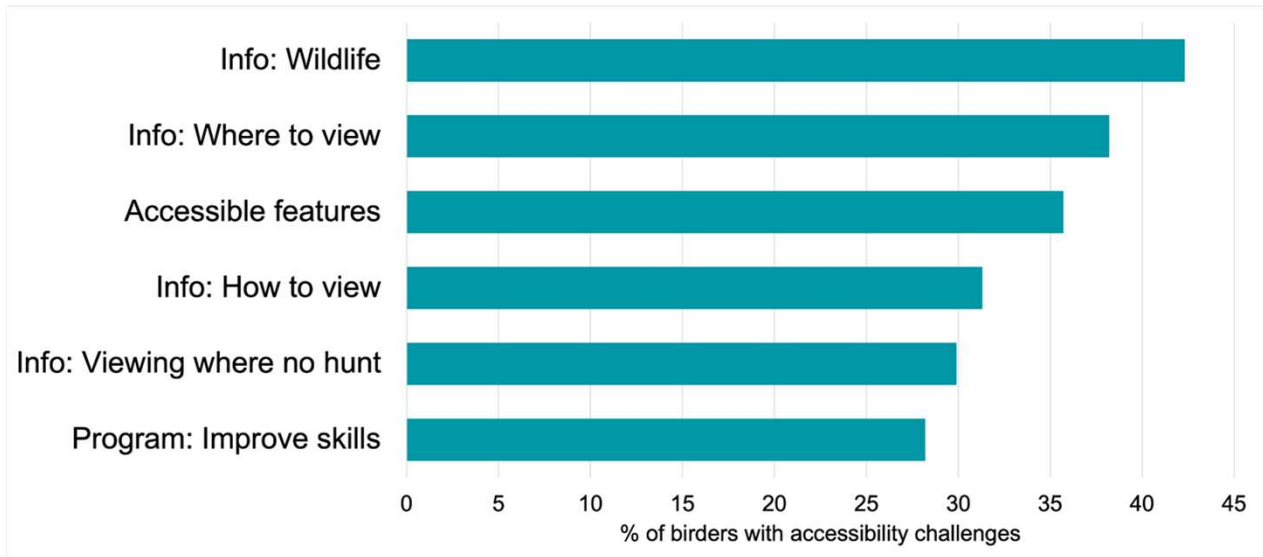

(Dippenaar & Kotze, 2005; Ghimire et al., 2014; Green et al., 2009; Karns et al., 2023; Sinkular et al., 2024.)

23

**Best practices
for including
disabled wildlife
viewers**

24

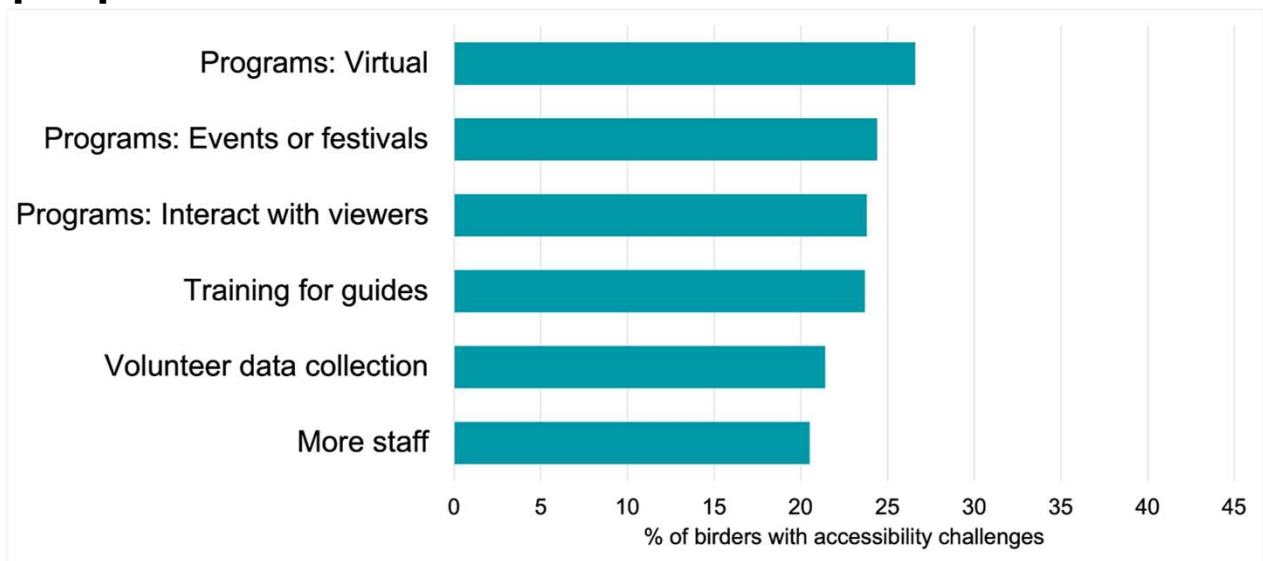

What would make wildlife viewing more accessible for people with disabilities?

(Sinkular, et al., 2024)

25

What would make wildlife viewing more accessible for people with disabilities?

(Sinkular, et al., 2024)

26

How should we design trails for people with disabilities?

Various guidelines including:

- Outdoor Developed Areas, United States Access Board, 2014.
- Design Guidelines for Accessible Outdoor Recreation Facilities, Parks Canada, 1994.
- Accessibility Design Standards for all Future Projects, Oregon Parks and Recreation Department, 2023.

Photo: Freya McGregor.

27

How should we design trails for people with disabilities?

- Surfaces: Firm, stable and slip-resistant.
- Length: Any.
- Width: 36-48".
- Slope: Up to 5%.
- Cross slope: No steeper than 2%.
- Benches: Every 150-200'.

Photo: Freya McGregor.

(United States Access Board, 2014; Parks Canada, 1994; Oregon Parks and Recreation Department, 2023.)

28

What are the best practices for designing accessible interpretive signs?

Various guidelines including:

- 2010 ADA Standards for Accessible Design, Section 703.
- Wayside Exhibits, National Park Service, 2009.
- Design Guidelines for Media Accessibility, Parks Canada, 1994.
- Smithsonian Guidelines for Accessible Exhibition Design, no date.

Photo: Freya McGregor.

29

What are the best practices for designing accessible interpretive signs?

Largest font size possible for layout

Main points understood in 45 seconds of reading

Strong contrast between text and background colors

Photo: Freya McGregor.

Provide information in alternative formats

Not a white background (it creates glare)

Text left justified

Use plain language

Sans serif fonts

(ADA Standards for Accessible Design, 2010; National Park Service, 2009 and 2017; Parks Canada, 1994; Smithsonian Institution, no date.)

30

How do we best communicate with people with disabilities when marketing programs?

- Use up-to-date disability-related language
- In any written communication use plain language:

- | | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"> ● Using headings ● Organize content logically ● Write short paragraphs ● Write short sentences ● Choose familiar words | <ul style="list-style-type: none"> ● Avoid jargon ● Remove unnecessary words ● Use lists to break up text ● Use bold text (not ALL CAPS) if you need to emphasize |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

(Federal Plain Language Guidelines, 2011.)

31

How do we best communicate with people with disabilities when marketing programs?

- Include disabled wildlife viewers in your marketing materials.
- Explicitly welcome people with disabilities to participate.
- Follow best practices for visual accessibility of any graphics.
- Ensure websites follow the Web Content Accessibility Guidelines.

*Photo: Freya McGregor.
(Schahfer & Robinson, n.d.)*

32

How do we best communicate with people with disabilities when marketing programs?

For programs held on trails, include:

- Contact information
- Parking and public transport availability
- Availability of toilets and drinking water
- Trail surface, width, maximum and average gradient and cross slope
- Frequency of benches/resting areas
- Obstacles
- Any other trail users

Photo: Freya McGregor.

(Access Recreation, 2013)

33

How do we ensure programs are inclusive for people with disabilities?

Staff and volunteers educated on disability inclusion, including:

- Viewing disabled people as “a normal person”
- Cultural humility
- Disability-related language
- Modifying the program or activity
- Soft skills, e.g. patience

Photo: Renee DePrato.

(Anderson & Heyne, 2000; Chikuta et al., 2018, p.9; Schleien et al., 1997; Armstrong et al., 2022)

34

How do we ensure programs are inclusive for people with disabilities?

- Hold wildlife viewing programs at locations:
 - Serviced by public transportation
 - Physically accessible
- Modify wildlife viewing programs by:
 - Building in more breaks
 - Moving at a slower pace
 - Creating stationary viewing opportunities
- Provide accurate information about the program's and location's accessibility.

(James et al., 2018; Karns et al., 2023; Schleien et al., 1997; Brown, 2017)

35

How do we ensure programs are inclusive for people with disabilities?

- Co-design programs
 - Increased engagement
- Build relationships and then “provide conditions so they can grow themselves”
 - Network with disability organizations
 - Develop an advisory board of disabled wildlife users

(Charlton, 1998; National Recreation and Park Association, 2018; Sutton-Long et al., 2016; Schleien et al., 1997)

36

How can we practice allyship to disabled wildlife viewers?

Allyship: Actively and intentionally **supporting**, uplifting and **advocating** for a person or **group that you do not belong to**, often **using your privilege** to help dismantle systems of oppression and promote social change.

Allyship pushes back against the “poor, tragic disabled people” narrative.

Photo: Freya McGregor.

(Kutlaca & Radke, 2022; Wolbring & Lillywhite, 2023.)

37

How can organizations practice allyship to disabled wildlife viewers?

- Use up-to-date language around disability.
- Provide accessibility features proactively, not reactively.
- Develop a Code of Conduct on expected behavior. Uphold it.
- Co-design programs with the disability community.
 - Ask how you can support, rather than assuming you know.
 - Share the community’s own work, rather than rephrasing it.
- Introduce disability organizations to your networks and resources.
- Learn how to apologize without being defensive.
- Keep learning! Allyship is a journey, not a destination.

(National Recreation and Park Association, 2018; Phillips & Bledsoe, 2021; Sutton-Long et al., 2016.)

38

What do we still need to know?

- How many disabled wildlife viewers there are? What kind of wildlife viewing do they engage in?
 - Include a disability-related question in surveys.
- Preferences of disabled wildlife viewers, eg. trail surfaces, design of safety barriers at viewpoints.
- Best practices for designing inclusive programming.

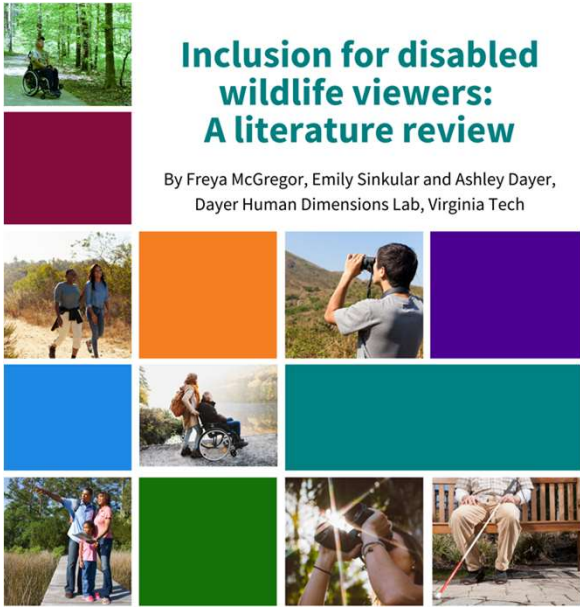

Photo: Freya McGregor.

39

What is next?

40

Inclusion for disabled wildlife viewers: A literature review

By Freya McGregor, Emily Sinkular and Ashley Dayer,
Dayer Human Dimensions Lab, Virginia Tech

41

The Dayer Human Dimensions Lab in collaboration with the Wildlife Viewing and Nature Tourism Working Group presents

Advancing Disability Inclusion: Findings from Virginia Tech

Part of the Disability Inclusion in Wildlife Viewing Spring Webinars series

**Wednesday May 29,
12-1pm Eastern**

Registration required:
<https://tinyurl.com/DisabilityWebinar2>

Photo: Ed Leathers.

42

Thank you for joining us today!

Thank you to our
Steering Committee

See you on May 29!
